

3 Elanus latius Alder:
 12 Decembris 1813. p. 407.

A is a white flint
 like a white flint
 with a brown body
 mass.

B is an entire flint
 the whole of it out
 its place where it grew to
 be broken off consisting of the
 same substance.
 They both of are and divided
 with five jagged like the
 roughness, but in the rough
 they are of a flat streak.

A is a white flint
like a whetstone rusted
over with a brown sandy
rust.

B is an entire flint
the work ~~manifest~~ upon it and
the place where it joins to
be broken off consisting of the
same substance.

They each of em are divided
with five seams like the
rappahock, but are the reach
shells of a flat sloped button.
